Subject: RE: Pechiney - Proposed Off-site UPRR Soil Sample Locations

Hi Linda,

Thanks for consulting with us by providing these sample locations. After reviewing the figures, I concur that the sampling scheme proposed in your 9/16 email will address EPA's characterization concerns in this area of the site. We look forward to reviewing the results.

Thanks also for providing the two figures on the proposed redevelopment (in a separate email) yesterday. It looks like most of the site will be covered either by buildings or asphalt.

I also want to verify – did you receive my email from Thursday, 9/10 which contained additional comments on the closure report? We appreciated your quick response to our original comments, which were helpful in clarifying the rationale for work accomplished to date. However there are still a few areas where we believe that further sampling is warranted. Please let me know your availability for discussing these comments/next steps.

Based on your 8/30 email, we understand that you are in the process of revising the draft Soil Management Plan (which we provided comments on) and draft Land Use Covenant. We look forward to receiving these documents so that we can review them as soon as possible.

Thanks for all the updates!

Regards,
Nathan

Subject: Pechiney - Proposed Off-site UPRR Soil Sample Locations

Hi Nathan,

As discussed during our last call, please find attached the sample location map for additional soil samples that are proposed on the segment of the Union Pacific railroad (UPRR) area west of soil removal Area 14 and in the area of off-site soil samples at W-1/W-2. Once we receive concurrence from EPA on the proposed sampling, we will forward the information to the UPRR contact to begin the process for obtaining access for sampling. Please let us know if you want to setup a call to discuss further.

Thank you, Linda
